Open Letter to Chancellor Dr. Angela Merkel in full awareness of the urgent need to act on Speed Limit on German Highways.

Dear Chancellor,

Related to the actual discussion about a general speed limit on German highways, we as European and German Federations of Road Traffic Victims would like to call again on your responsibility for the lives and corporal protection as human rights for all people living in Germany.

The discussion in Germany is hard to live for us. The fact that only an environmental emission debate was the reason for launching the discussion is showing that Road Safety aspects are completely neglected.

The duty of the state, and the three powers Legislative, Justicative and Executive, to protect...

E-Survey of Road Users' Attitudes
FEVR's Vision for the future is one where

We come as close as possible to zero deaths and serious injuries in road traffic.

We promote active mobility, healthy and environment friendly, with effective safety for pedestrians and cyclists.

We consider a better post crash response where medical care, investigation and justice are the three key issues to be better considered.

We, as voice of road victims since 1991, are heard, supported and included in decision making on national, European and global level.

World Day of Remembrance, each 3. Sunday in November, is supported by all who want to help raise awareness on these issues.
