Re: Nomination Acceptance Letter

Organizations: EFTHITA – OBSERVATORY ROAD SAFETY NGO Rhodes

Rhodes, Dodecanese, South Aegean, Greece

Dear honorable Board Members of FEVR:

With this letter I declare that I accept my nomination for the Board of FEVR. Even been a candidate for your Organization would be a great honor for me.

I feel it's time for me to step forward and represent EFTHITA in other Organizations or Federations, such as FEVR, by applying much of what I've learnt by Eleni Karidi and other EFTHITA members and associates. My goal is to "awaken" my generation and act for Road Safety and the Environment. I am aware that this is a difficult and task but I have what it takes to make it happen.

I have experience in union work and civic activities and I participate in many social events. Also, being a legal advisor to a Waste Recycling Company motivates me more about Road Safety, because I can see the connection between Environment and Road Safety measures (such us lower speed limits, more pedestrian areas in the cities etc.)

I have a great belief that the new generation of European Citizens can transform the EU in a more humanitarian and eco-friendly Union with direct democratic procedures. I am thrilled with the opportunity of being a representative of my generation in such a prestigious and active organization such as yours.

I can fully understand the message, the reason and the goals of Road Victims' Organizations, because I have also been involved in a Traffic Accident. Thankfully I was lucky, in opposite of others. And now I am able spread the message and convince people about Road Safety.

If I am elected as a new FEVR Board Member, I will propose and organize a new European Youth Forum under FEVR. I also am planning a collaboration with RescEU Mechanism and with its director, MP Nikos Androulakis. It would be great honor for me to be elected for FEVR on its 30th year of existence.

With great Respect,

Nikos Moutsakis
