## Acceptance Letter

I hereby confirm and accept the nomination of Przejście association from Poland to become a board member of European Federation FEVR. It is an honor for me to be presented as a candidate to FEVR member and independently from the result of voting I am grateful for considering me for the position. I also confirm my availability - required by the Federation time to dedicate to the issues of the organization.

For the last ten years I have been working actively in two main fields: prevention and victim support. I created national road safety association Center of Initiatives for Road Safety ([www.cibrd.org.pl](http://www.cibrd.org.pl)) leading the presidency and creating prevention programs for all road users for all country collaborating with polish government and scientist institutes, implementing education in regions. The Center is the biggest and most active association in the area of prevention in our country. At the same time I became board member of Przejście Association helping to prepare workshops and leading psychological help for Victims and Families. Przejście ([www.przejscie.com](http://www.przejscie.com)) is the strongest and biggest organization in Poland providing help in post crash response area. It is also the place where the only road traffic victims monument in Poland is placed. Thanks to great institutional cooperation, the main national polish celebrations of World Day of Remembrance are also placed in Przejście.

The strengths of us are mainly based on cooperation, active listening, communication and empathy. We have succeeded in many areas, both prevention and post crash response. But still we have a long way to go to reach the common goal. All based on clear and defined targets, long-term vision and acting consequently. None of this would be possible without team work, respect, deep empathy and humility towards road crashes Victims and Families.

And this approach I would like to present to apply as an active board member of FEVR. I deeply believe the acts of the Board shall reflect the experience from of each of FEVR member, follow the common vision with strength and loud voice. What I can contribute is my deep respect, empathy and lot of positive strength to go forward with a strong voice to reduce the number of road crashes and help all Those who lost the Beloved Ones.
